Forward-looking Statement

- This presentation contains forward-looking statements (within the meaning of the U.S. Private Securities Litigation Reform Act of 1995) and information relating to Abengoa that are based on the beliefs of its management as well as assumptions made and information currently available to Abengoa.
- Such statements reflect the current views of Abengoa with respect to future events and are subject to risks, uncertainties and assumptions about Abengoa and its subsidiaries and investments, including, among other things, the development of its business, trends in its operating industry, and future capital expenditures. In light of these risks, uncertainties and assumptions, the events or circumstances referred to in the forward-looking statements may not occur. None of the future projections, expectations, estimates or prospects in this presentation should be taken as forecasts or promises nor should they be taken as implying any indication, assurance or guarantee that the assumptions on which such future projections, expectations, estimates or prospects have been prepared are correct or exhaustive or, in the case of the assumptions, fully stated in the presentation.
- Many factors could cause the actual results, performance or achievements of Abengoa to be materially different from any future results, performance or achievements that may be expressed or implied by such forward-looking statements, including, among others: changes in general economic, political, governmental and business conditions globally and in the countries in which Abengoa does business; changes in interest rates; changes in inflation rates; changes in prices; decreases in government expenditure budgets and reductions in government subsidies; changes to national and international laws and policies that support renewable energy sources; inability to improve competitiveness of Abengoa's renewable energy services and products; decline in public acceptance of renewable energy sources; legal challenges to regulations, subsidies and incentives that support renewable energy sources; extensive governmental regulation in a number of different jurisdictions, including stringent environmental regulation; Abengoa's substantial capital expenditure and research and development requirements; management of exposure to credit, interest rate, exchange rate and commodity price risks; the termination or revocation of Abengoa's operations conducted pursuant to concessions; reliance on third-party contractors and suppliers; acquisitions or investments in joint ventures with third parties; unexpected adjustments and cancellations of Abengoa's backlog of unfilled orders; inability to obtain new sites and expand existing ones; failure to maintain safe work environments; effects of catastrophes, natural disasters, adverse weather conditions, unexpected geological or other physical conditions, or criminal or terrorist acts at one or more of Abengoa's plants; insufficient insurance coverage and increases in insurance cost; loss of senior management and key personnel; unauthorized use of Abengoa's intellectual property and claims of infringement by Abengoa of others intellectual property; Abengoa's substantial indebtedness; Abengoa's ability to generate cash to service its indebtedness; changes in business strategy; and various other factors indicated in the "Risk Factors" section of Abengoa's Form 20-F for the fiscal year 2013 filed with the Securities and Exchange Commission on March 19, 2014. The risk factors and other key factors that Abengoa has indicated in its past and future filings and reports, including those with the U.S. Securities and Exchange Commission, could adversely affect Abengoa's business and financial performance.
- Should one or more of these risks or uncertainties materialize, or should underlying assumptions prove incorrect, actual results may vary materially from those described herein as anticipated, believed, estimated, expected or targeted.
- Abengoa does not intend, and does not assume any obligations, to update these forward-looking statements.
- This presentation includes certain non-IFRS financial measures which have not been subject to a financial audit for any period.
- The information and opinions contained in this presentation are provided as at the date of this presentation and are subject to verification, completion and change without notice.

The Facts

1	The Company's consolidated financial statements reflect 100% of its outstanding debt
2	The Green Bond is guaranteed on a senior basis by Abengoa, S.A. and certain subs, like all the other HY bonds issued (pari-passu). The guarantees are outstanding during the whole life of the bond
3	For the Company, however, the Green bond proceeds are restricted to be used as bridge loans in eligible green projects. Long-term non-recourse financing will be replacing these temporary bridge loans
4	Abengoa has never failed to close non-recourse financing on any of its long-term concessional assets
5	Rationale for "non-recourse in process" has been to make a distinction between general corporate purposes guaranteed debt and project specific debt. Such rationale has been explained in our annual financial statements since 2002
6	Covenant of Syndicated Loan specifically excludes any non-recourse in process debt. Current covenant at 2.15x vs the limit of 3.0x (Sep'14) ==> Significant covenant headroom
7	All non-recourse in process financing (1,592 M€) is invested in low risk concessional assets under construction, with an enterprise book value of 1,875 M€

Action Plan

1 Commitment to maintain consistency in our quarterly presentations, which will include the following:

- Complete split of our debt by different type: corporate, non-recourse in process and non recourse
- Corporate and Consolidated Cash Flows
- Book value of concessional assets under construction

2 Commitment to publish a full set of quarterly financial statements

3 Maintain our corporate leverage target of 2.0x for 2014 and 2015

4 Establish a new leverage target including non-recourse debt in process of <5.0x in 2014 and <4.5x in 2015

5 Use current liquidity to selectively buy-back some of our outstanding bonds at current prices

ABENGOA

Green Bond Accounted as N/R Debt in Process

The nature of the Green Bond Issue is similar to other bridge financing that has been considered non-recourse in the past

Nature

- To finance, in whole or in part, existing and future Eligible Green Projects until the long-term funds associated to those projects are obtained
- In case of project divestment and, in any case, once the long-term funds associated to the projects in question are obtained, net proceeds will be used to finance other Eligible Green Projects

Use of Proceeds (as of Sep.30)

- To repay/replace more expensive bridge loans in Brazil and Mexico
- Remaining portion in cash at the project level

N/R Debt in Process Accounting Rationale

- Consistent with current accounting policies and to reflect the way the business is managed, the bond debt was treated as NR financing in process for accounting and financial presentation purposes
- Treatment included in the information audited by auditors (PWC and Deloitte) under IFRS
- Specific references to disclosure since 2002 in Annual Report

There are two type of instruments in Non Recourse Debt in Process

Bridge Loans

- Provided directly **to SPV by bank**
- **Same contractor guarantees** as a project finance (technical guarantees) but it **also has sponsor's guarantee** in case that long-term debt is not raised
- In last 20 years, 110 projects constructed with a total of ~12.6 B€ of project finance debt raised, **never having failed to convert a bridge loan**
- **Guarantees** cover:
  - ✓ Non-compliance with **construction schedule** (same as project finance)
  - ✓ Non-compliance with **project finance formalization** schedule (minimal, given that **conversion is assured** from the beginning

Green Bond Corp Facilities Bridge Loan

- Provided **to a corporate entity**
- **Same use of proceeds as Bridge Loans**: bridging debt in projects

Requirement for Both

- **Repaid with** the proceeds of the **long-term loan** once it is closed
- **Requirements** to obtain them:
  - ✓ Award of a **concessional agreement**
  - ✓ **Investment** to be made based on completion of **project milestones**
  - ✓ Some **commitment of a financial entity** to grant project finance

Debt Classification

	Use	Repayment	Corporate Guarantees	Net Leverage Targets 2014 & 2015
Corporate Debt	Corporate CAPEX and General Corporate Purposes	Corporate Cash/EBITDA	✓	Corp. Net Debt 2.0x
N/R Debt In Process	Short Term/Bridge Financing of Project Debt	Long Term Project Financing	✓	Corp. Net Debt + N/R in Process 2014 <5.0x 2015 <4.5x
N/R Debt	Long Term Financing of Project	Project Finance Cash Flow	✗	✗
