### III. BASIS OF PRESENTATION AND VALUATION ASSUMPTIONS

(In the drafting of financial or accounting type data or information included in this periodically published data, the valuation rules and principles and accounting criteria specified under prevailing legislation for the drafting of financial or accounting information must be applied to the drafting of the annual accounts corresponding to the year to which the periodically published data refer. If, exceptionally, the generally accepted accounting principles and criteria required under the corresponding prevailing legislation are not applied to data and information attached, this fact must be stated and sufficiently justified, explaining the impact that the non-application may have on the equity, financial status and the financial results of the company or its consolidated group. Furthermore, and with a similar scope to the previous point, any modifications that may have occurred to the accounting criteria used in the drafting of the attached information, in relation to the last audited annual accounts, as appropriate, must be stated and explained. If the same accounting principles, criteria and policies used in the last annual accounts have been applied and if they correspond to that specified under prevailing accounting legislation that applies to the company, it must be expressly stated). When adjustments and/or reclassifications have occurred during the previous year under prevailing accounting legislation that applies to the company, due to changes in accounting policies, corrections or changes in the classification of items, qualitative and quantitative data needed to understand the adjustments and/or reclassifications must be included in this section.)

#### **Bases for presentation. Information about First Half of 2005**

As regards the information corresponding to the particular results of Abengoa, S.A., it will be presented in accordance with the Spanish national accounting principles (General Accounting Plan).

The information corresponding to the consolidated results of the Abengoa Group has been prepared to comply with the International Financial Reporting Standards (IFRS), understanding as such those adopted by the European Commission pursuant to the procedure established by the (EC) regulation no. 1,606/2002 of the European Parliament and Council dated July 19, 2002. In Spain, Act 62, dated December 30, 2003, established that the consolidated annual accounts must be prepared in accordance with those Standards in the case of companies which, as of the closing date of their balance sheet, have stock officially listed in a regulated market.

Therefore, pursuant to the said legislation, and to comply with the stipulations of Circular 1, dated April 1, 2005, of the Spanish National Securities Exchange Commission (CNMV), both the financial information corresponding to the current and to the preceding year –in other words, that corresponding to the first half of 2004– have been prepared following the said International Financial Reporting Standards to provide comparable data of both time periods. Thus, the figures of the first half of 2004 will differ from those published originally.

Furthermore, pursuant to the aforesaid Circular 1/2005, the main impacts of applying the current IFRS on the company's assets as of January 1, 2005, are listed below together with the explanation of the main differences between the accounting principles applied to obtain the obtaining balance sheet as of January 1, 2005, under IFRS and the close of the previous fiscal year prepared using Spain's General Accounting Plan (PGC for its Spanish acronym).

- Summary of the impacts on the company's assets as of January 1, 2005:  
(EUR thousands)

Consolidated assets for fiscal year 2004 under PGC in Spain	362,611
Incorporation of minority stockholders	120,064
Establishment Expenses	-17,078
Research and Development Expenses	-36,862
Correction of Assets	-60,476
Selective revaluation of Tangible Fixed Assets.	79,691
Goodwill	-691
Financial Instruments and Exchange Rate Differences	-22,873
Valuation of Financial Investments	-5,187
Recognition of Revenue (work in hand)	4,418
Action Plans	8,643
Other Adjustments	582
Tax effect	17,605
Minority Stockholders for adjustments	<u>8,973</u>
Total Adjustments	-40,541
Consolidated Assets as of January 1, 2005, under IFRS	442,134

- Explanation of the main differences between PGC and IFRS

- Establishment Expenses: under PGC rules, this type of expense is capitalized and linearly amortized over a maximum period of five years. In general, it is posted under IFRS as an expense for the current fiscal year (IAS 38).
- R&D expenses: as in the preceding case, PGC rules allowed these to be capitalized and subsequently amortized over a maximum of five years. Under IFRS, research and development expenses are generally posted directly to the expenses for the fiscal year except for development expenses meeting certain requirements which are capitalized and amortized over their working lives.
- Correction of Assets: as a result of applying the IFRS, the existence of certain assets requiring corrective measures has been detected and these have been applied pursuant to the provisions of IAS 36.
- Selective revaluation of Tangible Fixed Assets: by application of IFRS 1, certain tangible fixed assets have been revalued: land and buildings.
- Goodwill: Abengoa has opted to apply the exemption stipulated in IFRS 1 so as not to recalculate the business combinations prior to January 1, 2004. Furthermore, in the case of goodwill expressed in foreign currencies, these have been converted to local currency in accordance with IFRS 1 and IAS 21 (under PGC these were converted at a historic exchange rate). Finally, goodwill under IFRS must be amortized, although it is subject to the performance of an annual impairment test in accordance with IAS 36.
- Financial instruments and exchange rate differences: the financial derivatives held by Abengoa correspond to interest rate and exchange rate hedging operations contracted to reduce the risks associated with these transactions. Pursuant to IAS 39, these operations are classified as cashflow hedging and so variations in the instruments' value are posted to reserves until the hedging is cancelled, at which time the amount accumulated in the accounts is passed to the operating statement. Furthermore, in accordance with PGC, unrealized positive exchange-rate differences must be deferred for the amount by which they exceed the negative exchange-rate differences posted to results in the period. Pursuant to IFRS, all exchange-rate differences, whether positive or negative and realized or unrealized, are posted to the operating statement.
- Valuation of Financial Investments: in line with PGC, financial assets are valued at the lower of their purchase price or market value and are removed from the balance sheet when they are disposed of, transferred or mature. Pursuant to IFRS, financial assets are classified into a series of categories that determine their fair-value appraisal and strict criteria are established regarding the removal of the financial assets from the balance sheet, on the basis of an assessment of the risks and benefits associated with the ownership of the item conveyed.
- Recognition of revenue (work in hand): Pursuant to IAS 11, the result is now recognized depending on the degree of progress applicable to the work carried out at the moment of the close.
- Action plans: under IFRS, liabilities have to be acknowledged for the amounts delivered to employees and the corresponding personnel expenses must be adjusted for the difference

between the price at which the items were sold to the employees and the agreed buyback price, i.e. the objective market price.

- Tax effect: under PGC, the timing differences reflect the variation in the tax or accounting allocation of revenue and expenses. In accordance with IFRS, there is a concept of temporary difference which corresponds to the difference between the book value of an asset or liability and its value for tax purposes thus generating the corresponding deferred or advanced tax credit on the difference. Furthermore, a temporary difference has been calculated for the tax impact on the accounting of the adjustments in the corporate assets due to the first application of the IFRS.
- On the other hand, the opening balance sheet for January 1, 2005, incorporates other items with no impact on the equity and representing sundry reclassifications of the balance sheet's assets and liabilities accounts, such as: rights over assets under financial leasing arrangements (IAS 17); capital subsidies; deferred expenses (financial expenses for leasing arrangements, formalization of debts, ...); non-existence of extraordinary income and expenditure as well as the consideration of the minority stockholders heading as an integral part of the equity item.

Finally, it is noted that the data corresponding to the first half of both years have been prepared in compliance with the regulations, principles and interpretations known about the IFRS up to now; they are the best estimation of the Group, have not yet been audited and are subject to future modifications.

With regard to the information published on 1st September 2005, and at the request of the CNMV, the modifications introduced consist of the reclassification of the amount under the heading "Other equity instruments" (including the amount corresponding to Conversion Differences), the heading "Reserves" in section VI Consolidated Comparative Balance, and the inclusion of the information relating to repayments to administrators in section XIV Operations with Affiliated parties (amounting to 2.735 million euros).

## **IX. BUSINESS PERFORMANCE**

(The information to be included within this section, in addition to complying with that specified in the instructions for the completion of this half-yearly information, must expressly detail the following aspects: variations in revenues and the costs attached to those revenues; breakdown and analysis of the principal transactions that have occurred in obtaining extraordinary results; comments on the most relevant investment and divestment transactions, explaining their effect on the company's working capital and in particular on the funding relating to it; sufficient explanation of the nature and effects of the parties that may have produced a significant variation in revenues or on the company's results, during the current six month period in relation to the corresponding figures reported for the previous six months. Furthermore, those companies submitting balance sheet and profit and loss account for the consolidated group under the International Standards of Financial Information adopted must provide detailed information about all the operations which have had a significant impact on the financial status, the profits and losses or the net equity of the company or its group, as a result of assets depreciation or reversal, assets appreciation to reach a fair value -including all derivatives and hedge book operations- foreign exchange differences, provisions, business combinations, activities classified as "discontinued" or any other transaction having a significant impact. Besides, they must provide a description of material variations in the item "non current assets classified as reserved for sale and non current assets discontinued operations" and related liabilities, significant variations in accepted risk and work in progress to reduce it as well as facts occurred after the year end, which, being relevant, have not been reflected in the financial information submitted. Finally, any comment on consolidated financial statements must be clearly distinguished from comments on individual financial statements, if any).

**X.1.) LOANS ISSUED, REPAID OR CANCELLED**

(This item must include separate information of each loan issued, repaid or cancelled from the opening of the financial year by the company which has to submit periodically public information or, if appropriate, by any of the companies of the group, explaining all the information asked for in the attached tables about each loan issued, repaid or cancelled. Such information must be provided separately, distinguishing those loans issued, repaid or cancelled which, regarding the issue or placement of the shares, have required the inscription of an explanatory booklet with an Authority (24) of a Member state of the European Union from those loans issued, repaid or cancelled which have not required it. As for loans issued, repaid or cancelled by affiliated companies or any other company than the controlling one, subsidiaries or multigroup, such information must be included as long as the loan issue or cancellations was guaranteed, totally or partially, by the holding company or by any subsidiary or multigroup company. Issues and placement of share in the market (25) can be aggregated (26) by type of operation (27), just as issues made by the same company within the same country, provided that they have similar characteristics. In the event that the loan is issued, repaid or cancelled through a "special purpose entity" (28), this fact must be expressly stated).
