

In Abengoa, we believe that the globe requires **Solutions** that allow our development to be more sustainable. Scientists tell us that **Climate Change** is a reality and from Abengoa, we believe the time has come to pursue and put these solutions into practice.

More than ten years ago, Abengoa decided to focus its growth on the creation of new technologies that contribute to **Sustainable Development** by:

- Generating **Energy** from renewable resources.
- Recycling Industrial **Wastes** and **Water** production and management.
- Creating **Infrastructures** that prevent new investments in assets that generate emissions.
- Creating **Information Systems** that assist in ensuring more efficient management of existing infrastructures.
- Establishing **New Horizons** for development and innovation.

To this end, we invest in Research, Development and Innovation, **R&D&I, Globally** extend the technologies with the greatest potential, and attract and develop the necessary **Talent**.

Moreover, through the **Focus-Abengoa Foundation**, we dedicate human and economic resources to promoting social action policies that contribute to social and human progress.

By doing this, we create **Long-Term Value** for our shareholders, contribute to the development of society in the areas in which we conduct our activities, and help to make the globe a better and more sustainable place for future generations.
