

Our Commitment

At Abengoa, we believe that the world needs solutions to pave the way for more sustainable development. Scientists tell us that **climate change** is a reality and at Abengoa we believe that now is the time to seek out solutions and put them into practice.

Over ten years ago, Abengoa made the strategic decision to focus its growth on the creation of new technologies geared towards **sustainable development**:

- Generating **energy** from renewable resources.
- Recycling industrial **waste** and generating and managing **water**.
- Creating **infrastructures** that eliminate the need for new investments in assets that generate emissions.
- Creating **information systems** that help to manage existing infrastructures more efficiently.
- Creating **new horizons** for development and innovation.

To this end, we invest in Research, Development and Innovation, R&D&I, **globally** expand those technologies with the greatest potential, and attract and develop the necessary **talent**.

In a similar vein, we channel human and financial resources into the **Focus-Abengoa Foundation** to promote social action policies that champion social and human progress.

By following this approach, we create **long-term value** for our shareholders, ensure the growth of the companies through which we operate and help to make the world a better and more sustainable place for future generations.
