Abengoa receives award for good health and safety practices in Chile

- The Santiago Subway in Chile has given the company the award in recognition of the work undertaken for a project that supplies electricity.
- This award clearly highlights the standards of excellence achieved in areas of Quality and Health and Safety in projects Abengoa carries out.

April 6 2017 – Abengoa (MCE: ABG/P:SM) the international company that applies innovative technology solutions for sustainability in the energy and environment sectors, has received the “I promote Safety” award from the Santiago Subway in Chile. This is in recognition of their good health and safety practices on the electrical supply project in which works are being carried out on subway lines 3 and 6 in Santiago.

This recognition can be added to others that have been awarded in the area of Safety, and serves to highlight the high standards of Occupational Quality and Safety that Abengoa applies in all of the projects it undertakes. Let us remember how Abengoa received recognition at the XV International Congress for Health and Safety, in the same city of Santiago de Chile, namely: “Special Mention for the Best International Practices in the Prevention of Occupational Risks.”

The project that has resulted in Abengoa being singled out for the award involves the development of the electrical system for lines 3 and 6 of the Santiago Subway, in addition to being responsible for its maintenance for a period of 20 years.

Abengoa is strongly committed to the health and safety of all of its employees, while also working continuously to implement the principles that make up its Health and Safety Policy, as well as its Policy for the Prevention of Occupational Risks.

About Abengoa

Abengoa (MCE: ABG/P:SM) applies innovative technology solutions for sustainability in the energy and environment sectors, generating electricity from renewable resources, converting biomass into biofuels and producing drinking water from sea water. (www.abengoa.com).
