Innovative technology solutions for **sustainability**

Abengoa is awarded the expansion of a water treatment plant in Mexico for Gas Natural Fenosa

- It will be integrated in the Norte Durango combined cycle plant.

14 September, 2017 – Abengoa (MCE: ABG/P: SM), the international company that applies innovative technology solutions for sustainable development in the infrastructure, energy and water sectors, has been selected by Gas Natural Fenosa for the expansion of a water treatment plant in the 450 MW Norte Durango combined cycle plant, located in the State of Durango.

In order to strengthen the combined cycle plant, Gas Natural Fenosa has entrusted Abengoa the design, construction and commissioning of this extension project. The aim is to increase the production of demineralized water and keeping a constant feed of water supply that the combined cycle needs.

The plant will have 1,000 m³/day of treatment capacity, applying the latest technology in desalination using CCRO (Close Circuit Reverse Osmosis) and CDI (Capacitive De-Ionization) modules. Construction is expected to start in September of the current year.

Abengoa is a world leader in the water sector with more than 70 years of history developing water treatment, desalination and water infrastructure projects. In Mexico, it has been present since 1981, carrying out conventional and renewable energy projects, electricity transmission and distribution, oil and gas, water and singular construction.
