

ABENGOA

Innovative technology solutions for **sustainability**

Abengoa collaborates in the reforestation of the Los Dinamos National Park in Mexico

- More than 450 volunteers, including employees, families and friends, managed to plant 3,000 trees in just one day.

Seville, December 4, 2012.- Abengoa, the international company that applies innovative technology solutions for sustainable development in the energy and environment sectors, organized a day to help with the reforestation program of the area known as "Ladera de Sayula" in the Los Dinamos National Park.

This year the volunteers beat their record both in terms of the number of participants and trees planted. Some 470 volunteers, including employees, families and friends, managed to plant 3,000 trees, of which 2,700 were oak and 300 were laurel, both indigenous species.

On this occasion, a group of mentally-challenged adults also participated from the Mexican Labor Center (Celamex). The company collaborates with the Center through its PE&C social development program (People, Education and Communities: Committed to Development).

About Abengoa

Abengoa (MCE: ABG) is an international company that applies innovative technology solutions for sustainable development in the energy and environment sectors, generating electricity from the sun, producing biofuels, desalinating sea water and recycling industrial waste. (www.abengoa.com)
