## The Andalusian Parliament approves a non-law proposal in support of Abengoa

- It was presented in plenary session at the request of the socialist group for the maintenance of the company in Andalusia.

May 28, 2021 – The Andalusian Parliament has joined the institutions that have shown their support for the company in recent weeks, after the Seville City Council and the Provincial Council.

The plenary session of Parliament has agreed to urge the Board of Governors to become actively involved, through a program of aid, in the maintenance of the company's business and industrial activity in Andalusia, as well as its headquarters. In this way, the continuity of the thousands of direct and indirect jobs generated in the autonomous community would be ensured.

This has occurred after the presentation of a non-law proposal that emerged from the socialist parliamentary group and that has been approved thanks to the votes of PSOE-A, Vox and Adelante Andalucía.

In this proposal, "the Board of Governors is urged to grant the requested assistance" and "to participate in the consensus that is reached for the financial viability of the company, within the framework requested by Abengoa from SEPI, with the objective of retaining innovation, technology, talent and quality employment in Andalusia".

### About Abengoa
