

## **Abengoa, once again recognized as an international leader in desalination by Engineering News-Record**

- Engineering News-Record (ENR) magazine has recently published its ranking of the leading international construction companies.
- Abengoa is ranked among the top in water treatment, desalination, solar energy and cogeneration.

December 30, 2021 - Abengoa, an international company that applies innovative technology solutions for sustainable development in the infrastructure, energy and water sectors, has been recognized for its leadership in the Top International Contractor 2021 ranking, prepared and published annually by the prestigious magazine Engineering News-Record (ENR).

ENR is considered a reference platform in the construction sector, providing information, news and analysis through its magazine and website. ENR's rankings are based on the previous year's home and foreign revenues of the more than 250 participating contractors.

Specifically, the company ranks first in the development of water treatment and desalination projects, as well as third and fourth in solar energy and cogeneration projects, respectively.

It also appears in other categories such as operation and maintenance (fourth position), transmission and distribution (tenth position), water supply (twelfth position) and energy (fifteenth position).

On the other hand, Abengoa is ranked 61st in the Top 250 International Contractors ranking, published by ENR in August 2021, which includes the top 250 international contractors.

With this new recognition, the company consolidates its position as an international leader in the development of water and energy projects, where it already has numerous awards from specialized institutions in the water sector, such as Global Water intelligence and the International Desalination Association, or energy, such as CSP Plaza.
