

ABEINSA

ENR 2007 Global Construction Sourcebook

<http://www.enr.com>

<http://enr.construction.com/people/sourcebooks/globalConst/default.asp>

Summary of references to Abeinsa in ENR 2007 rankings:

✓ Top 225 International Contractors:

By revenue abroad, Abeinsa is ranked 54 (53 in 2006) (see table 1)

✓ Top 225 Global Contractors:

By global revenue (Spain included), Abeinsa is ranked 88 (93 in 2006) (see table 2)

✓ Top 10 International Contractors by Region:

Abeinsa is the No. 6 Latin America contractor (6 in 2006) (see table 3)

✓ Top 25 International Contractors in Power:

Abeinsa is the world's No. 2 (3 in 2006) (see table 4)

✓ Top 5 International Contractors in Transmission and Distribution:

Abeinsa is the world's No. 1 (2 in 2006) (see table 5)

✓ Top 10 International Contractors in Telecommunications:

Abeinsa is ranked No. 10 (not available in 2006) (see table 6)

Note: These 2007 rankings are based on 2006 sales figures.

Engineering News-Record (ENR) is a weekly publication providing news, analyses, data and opinion from the construction industry worldwide. It has been published since 1874 and The McGraw-Hill Companies are its proprietors.

ENR is one of the sector's most prestigious technical magazines and its mission is to provide news, analyses, comments and data to allow professionals from the construction industry achieve more efficient execution of their works.

There are more than 70,000 paid-up subscribers to the weekly paper issue of the magazine, and its website receives more than 90,000 different visits a month.

Subscribers to the magazine include contractors, engineers, architects, government regulators, and major customers and providers from the sector.

It covers the design and construction of large infrastructures such as: stadiums, airports, large buildings, bridges, dams, tunnels, power plants, industrial facilities, potable and wastewater treatment and toxic waste recycling plant projects. Moreover, it addresses construction industry related financial, legal, security, environmental, company management and labor topics.

Each year, ENR collects data and publishes several rankings of the major US and international engineering and construction companies based on gross revenue. These rankings include the Top 225 International Contractors, the Top 200 Engineering Companies, the Top 400 General Contractors of the US, or the Top 500 Design Firms (architecture and engineering firms) of the US.

Given that more than 90 percent of the companies listed in the rankings are privately-owned, most of the financial data that figures in its studies are not available elsewhere.

Participation is voluntary and, even though the number of companies providing data is growing each year, there might still be some company that has not yet been included in the rankings.

The Global Construction Sourcebook is a special issue with data on, and details of the rankings of the Top 225 International Contractors and the Top 200 International Design Firms.

The magazine begins with a Overview that includes the general listings while separating engineering firms from contractors. In addition, it also provides two independent listings:

- Top International: this only takes revenue generated by firms outside their home country in 2006 into account.
- Top Global: this takes global revenue in 2006 into account.

Following this Overview, the magazine ranks engineering firms and contractors for each of the following sectors:

- Environmental,
- General Building,
- Manufacturing/Industrial Process,
- Petroleum,
- Power,
- Telecommunications,
- Transportation.

The Top 225 International Contractors
