

A high-angle, close-up photograph of a circular water treatment tank. The central focus is a long, narrow metal channel with a series of curved blades or baffles, through which water is being poured, creating white foam and splashing. The surrounding structure is made of blue-painted metal, showing some signs of wear and rust. The background is a blurred grid of metal beams, suggesting an industrial setting. A large, semi-transparent white circle is overlaid on the left side of the image, containing the text.
