

## Abengoa gets the CSP Globalization Contribution Award in China

- This award lies in the contribution and participation in global major CSP (Concentrated Solar Power) markets, promoting the development of global CSP projects.

XX June 2018 – Abengoa (MCE: ABG.B), the international company that applies innovative technology solutions for sustainability in the infrastructure, energy and water sectors, has been awarded with the CSP (Concentrated Solar Power) Globalization Contribution Award by the largest and highest-level international annual event in China's CSP industry, CSP Plaza 2018 annual conference.

On behalf of Abengoa, the award was presented to Jose Manuel Lopez Cepeda, Business Development Director for the Energy sector, in a ceremony that brought together over 1,000 professionals of the CSP industry worldwide.

This award lies in the contribution and participation in global major CSP markets, promoting the development of global CSP projects. Abengoa has recently been awarded technology, engineering and support contracts for two new solar thermal projects in China. These achievements are a proof of the world leader position that Abengoa holds in the solar sector with an installed base of 2.3 GW and having constructed solar plants in four continents.

CSP Plaza 2018 annual conference was held in Beijing (China), between June 20th and 22nd. The last edition was focused to emerging markets such as China, Morocco, United Arab Emirates and Australia which are leading the future development of global CSP market. Seeking balance between development and sustainability has become a common theme in the global CSP industry.

### **About CSP Plaza**

CSP PLAZA is a reputed professional website in china solar thermal power industry. It's a reference point for CSP professionals and a cornerstone for communications within the CSP industry. CSP Plaza hosts a leading conference and trade exhibition for CSP professionals in Beijing (China). The event brings together over 1,000 decision makers and CSP professionals to source the latest solutions and the current situation of the CSP market. This event is one the largest CSP professional's events focused on all aspects of the provision of solar thermal energy.
